Please Read:
This map shows the official Church unit boundaries for your ward or stake, according to records at Church Headquarters. Please consider the following factors as you review this map:

- All approved boundaries from previous boundary change proposals received from your ward or stake, have been incorporated in this map.
- Do not be concerned if your map includes unshaded areas that you have not considered part of your unit. Church policy requires that all the land area of the world be included in the boundaries of an ecclesiastical Church unit. This means that rivers, lakes, national parks, golf courses, recreation areas, and other unshaded areas may be included as part of your unit. When unit boundaries extend into unshaded areas, they are normally extended to some logical limit, such as a river, edge line, or county boundary. When unit boundaries reflect large areas that are otherwise unshaded, we can provide a zoom-in map of the parts of the unit where most of the population is shown.

Questions, contact the Member and Central Records Department, COB 1396, 1361-246-5500.

IF YOU ARE PREPARING A BOUNDARY CHANGE PROPOSAL:
It is important that you review THIS MAP with the proposal, and make use of all proposed changes are marked on it. If the map is not otherwise completely correct to any additional maps you have used, then the details of your proposal.

If dated on this map is adequate, NO action description or date needed to be required for the B.C.C. proposal.

For Church use only
